**Fig. S1** Sequence alignment of adenosine A\textsubscript{3} receptor and adenosine A\textsubscript{2A} receptor

**Fig. S2** MD received stable conformation of adenosine A\textsubscript{3} receptor

**Fig. S3** Ramachandran plot of modeled adenosine A\textsubscript{3} receptor

A, B and L represent the residues in most favored regions; a, b, l and p represent the residues in additional allowed regions; ~a, ~b, ~l and ~p represent the residues in generously allowed regions.
